

STOXX Limited is a leading provider of global indices, such as the EURO STOXX 50®, STOXX® Europe 50, STOXX® Europe 600, STOXX® Global 1800 and STOXX® Select Dividend indices.

The STOXX Product Development Team is responsible for the design and development of innovative new indices to add to the above. To be located at our headquarters in Zurich, Switzerland, we are currently looking for a

PRODUCT DEVELOPMENT MANAGER

JOB

The successful candidates will be part of the STOXX product development team and take responsibility for the development of new indices in close coordination with the customers of STOXX. Focus of the activities will be the development of indices for alternative asset classes to equities and bonds such as for example commodities. The successful candidate will be directly interacting with customers in order to design indices according to customer and market demands and will additionally be responsible for their implementation within STOXX and all necessary coordination with the sales, marketing, PR and IT teams. The successful candidate will also be responsible for the continuous improvement of the created products and services and their adoption to changes in the respective financial markets. This also includes the management of market consultation committees and the attendance of international specialist conferences. In addition the successful candidate will be the primary contact person for all new asset class indices, including the existing commodity and volatility indices in STOXX.

PROFILE

The position requires candidates with a master's degree in economics, natural sciences or related subjects. Significant work experience in the financial services industry especially with respect to alternative asset classes such as commodities is required. To fulfil these tasks in a dynamic international environment, the successful candidate must possess strong numerical and analytical skills, excellent problem solving capabilities, strong written and verbal communication skills, flexibility and team spirit. The ideal candidate should be able to manage index development projects with a minimum of supervision, in a time-efficient manner and have sound knowledge of MS Office (especially Excel and Access) as well as database and internet-related applications. Proficiency in both written and spoken English is required. Additional proficiency in further languages is preferable although not necessary. This is an excellent opportunity for the right candidate to develop his financial markets experience and actively shape the financial markets of the future.

CONTACT
