10. iSTOXX & REFERENCE RATE INDICES

The iSTOXX® indices differ from the STOXX® indices in that they cover less generalized and non-standard concepts and methodologies. This means that the rule-sets usually differ from the standard rule book. To ensure full transparency, the guidebooks for the iSTOXX® indices are publicly accessible, just like the STOXX brand. There are no regional limitations. Multiple indices per country, theme or region may be offered to represent diverse approaches to a similar topic and cater to diversified client needs.
