

# EURO STOXX TOTAL MARKET VALUE LARGE

## Index description

The STOXX Total Market (TM) Style indices are designed to enable investors to monitor the performance of Eurozone and European countries with similar growth and similar value characteristics. The index series also comprises large, mid and small Style indices.

The indices are based on how securities score with respect to six factors. The six factors that are applied to define a company's style designation are condensed into a single style score, leading to a number that measures a company's style purity. Index components are weighted by free-float market cap.

## Key facts

» The indices enable investors to monitor the performance of European and Eurozone companies with similar style characteristics

## Descriptive statistics

Index	Market cap (EUR bn.)		Components (EUR bn.)				Component weight (%)		Turnover (%)
	Full	Free-float	Mean	Median	Largest	Smallest	Largest	Smallest	Last 12 months

	Trailing	Projected	Trailing	Projected	Trailing	Trailing	Trailing	Trailing
EURO STOXX Total Market Value Large	9.6	7.9	8.4	7.7	1.0	4.8	0.6	6.3
EURO STOXX	14.7	12.1	12.7	11.7	1.6	2.9	1.0	4.3

Performance and annual returns<sup>4</sup>

## Methodology

The style characteristics of each stock are determined by analyzing six factors:

projected price-to-earnings ratio, trailing price-to-earnings ratio, price-to-book ratio projected earnings growth, trailing earnings growth, dividend yield.

The qualifying STOXX Europe TMI Large stocks are ranked according to six factors. For each stock the values of the six factors are z-scored for normalization. A multivariate cluster analysis is conducted to produce five clusters: Strong growth (SG) and weak growth (WG), strong value (SV) and weak value (WV) and neutral (NT). The detailed methodology including the calculation formula can be found in our rulebook:

## DISCLAIMER

STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Börse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Börse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Börse Group or their licensors, research partners or data providers.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return
