## Methodology

To be included in the STOXX 3D Global Printing Tradable Index, a company must pass through the following criteria - generate more than 1% of its revenue from the 3D printing sector, have a minimum three-month average daily trading volume (3-month ADTV) of 250,000 euros, a minimum free-float market cap of 80 million euros and be listed in a country classified as a developed market according to STOXX's country classification model. All companies that meet these requirements are ranked by free-float market cap. The top 30 companies will be selected for inclusion in the index. The detailed methodology including the calculation formula can be found in our rulebook: [www.stoxx.com/indices/rulebooks.html](http://www.stoxx.com/indices/rulebooks.html)
