STOXX GLOBAL INTELLIGENT COMPUTING

Index description

Artificial intelligence (AI) is the science of creating computer programs and machines that exhibit human-like intelligence and cognitive skills. The STOXX® Global Intelligent Computing Index is comprised of companies from a wide range of industries that invest heavily in the development of new Al technologies. These companies are, therefore, considered to be wellpositioned to benefit from the increased adoption of AI technologies.

Key facts

»Index allows targeted investment in AI, a significant megatrend.

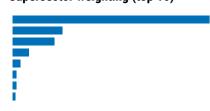

»Detailed Revere data helps select companies with a revenue exposure above 50% to Al-related sectors.

»Size and liquidity filters ensure replicability.

Performance and annual returns4

STOXX Global Intelligent Computing

STOXX Developed and Emerging Markets Total Market

Methodology

The parent index of the STOXX Global Intelligent Computing Index is the STOXX® Developed and Emerging Total Market Index. The index applies several screens that include:

Liquidity screening: Only stocks with a 3-month average daily trading value (ADTV) greater than EUR 1,000,000 are included.

Revenues: More than 50% of revenues over the past year generated within the aggregate of the RBICS sectors associated with Al.

Market capitalization screening: Free-float Market Capitalization greater than 100 million EUR

The index composition is reviewed annually and weighting factors are recalculated quarterly.

The detailed methodology including the calculation formula can be found in our rulebooks: www.stoxx.com/rulebooks

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
