

# STOXX GLOBAL CLIMATE CHANGE LEADERS

## Index description

The STOXX Global Climate Change Leaders Index is based on the CDP 'A list' database, previously known as the Climate Performance Leadership list. This unique index concept includes carbon leaders who are publicly committed to reducing their carbon footprint. CDP's 'A List' was originally produced at the request of 767 investors who represent more than a third of the world's invested capital.

## Key facts

- » Derived from STOXX broad, yet liquid broad indices to ensure tradability.
- » The index tracks only stocks who are publicly committed to reducing carbon emissions.
- » The index is the first ever that tracks the CDP 'A List' available to market participants, offering a fully transparent and tailored solution to address long-term climate risks, while participating in the sustainable growth of a low-carbon economy.

## Methodology

Based on the CDP A-list, previously the Climate Performance Leadership list, dataset as provided by CDP. STOXX calculates a Z-score for the population and the index is price weighted with a weight factor based on the free-float market capitalization multiplied by the corresponding Z-score carbon intensity factor of each constituent. This procedure creates a tilt and will overweight those stocks with lower carbon intensities and underweight companies the one with higher carbon intensities. Individual components are subject to a 5% cap.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
