

# STOXX® EUROPE 600 HEALTH CARE INDEX

## Index description

The STOXX NC Supersector indices track supersectors of the relevant benchmark index. The letters NC stand for non-capped. Unlike supersector indices derived from the STOXX Europe 600, the NC version has no component capping. The Industry Classification Benchmark (ICB) identifies 19 supersectors. Companies are categorized according to their primary source of revenue. The following supersectors are available: automobile and parts, banks, basic resources, chemicals, construction and materials, financial services, food and beverage, health care, industrial goods and services, insurance, media, oil and gas, personal and household goods, real estate, communications, retail, technology, travel and leisure and utilities.

## Key facts

» Categorization according to their primary source of revenue guarantees an accurate classification of companies in their respective business environments

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return
