

SWISS PERFORMANCE INDEX SPI PRICE INDEX

Stated objective

"The SPI Family comprises various indices compiled and published by the SIX Swiss Exchange. The underlying share universe includes approximately 230 equity issues. For a company's shares to be included in the SPI universe, the company must be primary listed in Switzerland and the shares must have a free float equal to or greater than 20 %. In 1998, all investment companies were taken out of the SPI Family and put into the specially designed Investment Index."

Key facts

- » "In order to achieve the stated index objective SIX Swiss Exchange defines the general principles that govern the index methodology. SIX Swiss Exchange publishes the index objective and rules for all indices.
- » Representative: the development of the market is represented by the index
- » Tradable: the index components are tradable in terms of company size and market
- » Replicable: the development of the index can be replicated in practise with a portfolio
- » Stable: high index continuity
- » Rules-based: index changes and calculations are rule-based
- » Projectable: changes in rules are with appropriate lead time (usually at least 2 trading days) no retrospective rule changes"

Performance and annual returns³

Methodology

"The Swiss Performance Index SPI® attempts to represent the development of the entire Swiss equity market. The SPI® therefore comprises all equities whose primary listing is on SIX Swiss Exchange. There are two exceptions: Equities with a free float of less than 20% are not included in the SPI® due to their limited liquidity (tradability). Investment companies are not included in the SPI®; this is to prevent companies from being counted twice. Investment companies that invest exclusively in companies with no primary listing on SIX Swiss Exchange may be admitted to the SPI® upon request. In principle, only equities of Swiss companies domiciled in Switzerland are admitted to the SPI®."

BACKTESTED PERFORMANCE

This document contains index performance data based on back testing, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Back tested performance information is purely hypothetical and is provided in this document solely for information purposes. Back tested performance does not represent actual performance and should not be interpreted as an indication of actual performance.
