

ISTOXX[®] FACTSET AUTOMATION & ROBOTICS INDEX

Index description

The iSTOXX FactSet Thematic indices are comprised of companies from selected markets exposed to a defined set of themes: Ageing Population, Automation & Robotics, Digitalisation, Breakthrough Healthcare. These companies operate in business areas that actively participate in social, economic and environmental changes and drive long-term structural trends.

To be eligible, companies must derive 50% or more of their revenues from businesses that fall under respective themes. FactSet Revere data is used for a granular breakdown of the revenue sources of the companies in the screening process. This in turn allows enhanced precision in the thematic investment approach and in the selection of companies with substantial exposure to the targeted themes.

Key facts

- » Choice of themes based on long-term structural trends
- » Based on FactSet Revere data for a detailed revenue breakdown
- » Inclusion of size and liquidity filters to ensure replicability of the index

Descriptive statistics

Index	Market cap (EUR bn.)		Components (EUR bn.)				Component weight (%)		Turnover (%)

Performance and annual returns³

Methodology

The index universe of the iSTOXX FactSet Automation & Robotics index is defined as all stocks from the STOXX Global Total Market index that derive more than 50% of their most recent total annual revenues from sectors linked to the Automation & Robotics business and which are classified as belonging to a defined set of developed and emerging countries.

The companies in the index universe are screened for all of the following criteria:

- » Country classification: stocks classified as part of the eligible countries list
- » Minimum liquidity: 3-month average daily trading value (ADTV) greater than one million EUR
- » Minimum size: free-float market capitalization greater than 200 million EUR
- » Revenues: more than 50% of revenues generated within the sectors associated with the Automation & Robotics theme.

The index aims to have a minimum number of 80 constituents at each review.

The index is reviewed annually in June.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

DISCLAIMER

STOXX, Deutsche Boerse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Boerse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Boerse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Boerse Group or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.
