

STOXX® GLOBAL CLIMATE CHANGE LEADERS INDEX

Index description

The STOXX Global Climate Change Leaders Index is based on the CDP A list database, previously known as the Climate Performance Leadership list. This unique index concept includes carbon leaders who are publicly committed to reducing their carbon footprint. CDPs A List was originally produced at the request of 767 investors who represent more than a third of the world's invested capital.

Key facts

» Derived from STOXX broad, yet liquid broad indices to ensure tradability.

» The index tracks only stocks who are publicly committed to reducing carbon emissions.

» The index is the first ever that tracks the CDP A List available to market participants, offering a fully transparent and tailored solution to address long-term climate risks, while participating in the sustainable growth of a low-carbon economy.

Methodology

Based on the CDP A-list, previously the Climate Performance Leadership list, dataset as provided by CDP. STOXX calculates a Z-score for the population and the index is price weighted with a weight factor based on the free-float market capitalization multiplied by the corresponding Z-score carbon intensity factor of each constituent. This procedure creates a tilt and will overweight those stocks with lower carbon intensities and underweight companies the one with higher carbon intensities. Individual components are subject to a 5% cap.
