Methodology

The iSTOXX Single Stock Leverage Indices are calculated according to the exchange calendar of the underlying stock. The indices aim to replicate performance of a leveraged investment strategy into the underlying stock adjusted by the interest paid or received, brokerage margin fee and cost of borrowing (for inverse leveraged indices only). The detailed methodology including the calculation formula can be found in our rulebook for strategy indices: www.stoxx.com/indices/rulebooks.html

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
