## **EURO ISTOXX® AMBITION CLIMAT PAB INDEX**

#### **Index description**

The EURO STOXX Ambition Climat PAB Index is based on liquid securities from the EURO STOXX Total Market Index. The index follows the EU Paris-Aligned Benchmark (EU PAB) requirements outlined by the European Commission for climate benchmarks.

Companies identified as non-compliant based on Sustainalytics Global Standards Screening (GSS) assessment, or are involved in anti-personnel mines, biological and chemical weapons, cluster weapons, depleted uranium and white phosphorus weapons are not eligible for selection. Securities that generate revenues above a certain threshold from coal, oil, gas or generate power with carbon intensity of lifecycle emissions higher than 100g CO2e/kWh, as identified by ISS ESG, are excluded. Furthermore, STOXX will exclude companies that ISS ESG assesses to have Significant Obstruction in the UN SDGs 12,13,14 and 15.

The weighing process follows an optimization process with the aim to reduce the index green house gas intensity by at least 50% when compared to the benchmark. The index is also designed to meet the year on year 7% decarbonisation target, with trajectory in line or beyond the 1.5C scenario by 2050, as verified by ISS ESG.

#### **Key facts**

»The index is designed to help investors shift towards a low-carbon economy and align investments to the Paris Climate Agreement

»Scope 1, Scope 2 and Scope 3 used across all sectors from the first date of the index construction

»The index aims to reduce its greenhouse gases emission intensity by at least 50% when compared to the benchmark index

»Sectors key to the low-carbon transition, high climate impact sectors are not underweighted relative to the benchmark

»The index is designed to meet the year on year 7% decarbonization target

»Index overweights securities with concrete targets and emission reduction targets verified by the Science Based Target initiative (SBTi)

#### Performance and annual returns4

#### Methodology

The EURO STOXX Ambition Climat PAB Index is based on liquid securities from the EURO STOXX Total Market Index. The index follows the EU Paris-Aligned Benchmark (EU PAB) requirements outlined by the European Commission for climate benchmarks.

Companies identified as non-compliant based on Sustainalytics Global Standards Screening (GSS) assessment, or are involved in anti-personnel mines, biological and chemical weapons, cluster weapons, depleted uranium and white phosphorus weapons are not eligible for selection. Securities that generate revenues above a certain threshold from coal, oil, gas or generate power with carbon intensity of lifecycle emissions higher than 100g CO2e/kWh, as identified by ISS ESG, are excluded. Furthermore, STOXX will exclude companies that ISS ESG assesses to have Significant Obstruction in the UN SDGs 12,13,14 and 15.

The weighing process follows an optimization process with the aim to reduce the index green house gas intensity by at least 50% when compared to the benchmark. The index is also designed to meet the year on year 7%

#### BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

#### CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
