

# ISTOXX® MUTB JAPAN ESG QUALITY 200 INDEX

## Index description

The iSTOXX MUTB ESG Quality 200 Indices aim to capture the performance of high-quality ESG-compliant companies in their respective region. Companies non-compliant based on Sustainalytics Global Standards Screening Assessment or involved in Controversial Weapons are excluded. Selection is based on a combined screening and ranking of ESG scores and four fundamental indicators (profitability, leverage, cash flow generation ability and business stability). Stocks need to fulfill minimum liquidity criteria before being added to the index.

## Key facts

- » Investing in high-quality ESG-compliant companies with sustainable profitability
- » ESG screening excludes companies non-compliant based on Sustainalytics Global Standards Screening Assessment or involved in Controversial Weapons
- » Diversification through broad selection and capping of component weights at 2%
- » Tradability ensured through liquidity requirements

## Methodology

The iSTOXX MUTB ESG Quality 200 Indices aim to capture the performance of high-quality ESG-compliant companies from their respective parent universe. First, companies non-compliant based on Sustainalytics Global Standards Screening Assessment or involved in Controversial Weapons are excluded. Companies are then selected based on a combined screening and ranking of ESG scores and four fundamental indicators (profitability, leverage, cash flow generation ability and business stability). Stocks need to fulfill minimum liquidity criteria before being added to the index.

The constituents are weighted according to free-float market capitalization with a cap at 2%. The indices are reviewed semi-annually in June and December and rebalanced quarterly.

The detailed methodology including the calculation formula can be found in our rulebooks: [www.stoxx.com/rulebooks](http://www.stoxx.com/rulebooks)

## DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX indices, DAX indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return
