ISTOXX INDICES ISTOXX® MUTB GLOBAL QUALITY 150 INDEX

Index description

The iSTOXX MUTB Global Quality indices aim to capture the performance of quality companies with high profitability, low leverage and sustainable cash flows. The component selection is based on a combined ranking of four fundamentals ratios (return on equity, debt-to-capital, cash flow generation ability and business stability). Stocks need to fulfill minimum liquidity criteria before being added to the index.

Key facts

» Pure quality play with large investability.

» Ideal for market participants seeking exposure to the global market while only investing in quality stocks with sustainable profitability.

Descriptive statistics

Performance and annual returns⁴

Methodology

The indices are derived from their benchmark index, identified by ICB Sector 351020, and stocks classified as Japan on the STOXX Total Market index but incorporated outside of Japan are excluded from the universes.

The indices are weighted according to free-float market capitalization with a 2% maximum capping per constituent.

BACKTESTED PERFORMANCE

DACH IS IED FERTORWARDE This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
