

ISTOXX® EUROPE ESG LEADERS ADDITIONAL EXCLUSIONS SELECT 30 INDEX

Index description

The iSTOXX Europe ESG Leaders Additional Exclusions Select 30 Index captures the performance of 30 European stocks with low volatility and high dividends from the STOXX Global ESG Leaders Index.

STOXX will exclude companies that are non-compliant with the Global Standards Screening (GSS) or are involved in Controversial Weapon activities, as identified by Sustainalytics. Additionally, companies involved in Tobacco, Thermal Coal and Military Contracting are also excluded.

The component selection process also excludes all stocks whose 3- or 12-month historical volatilities are the highest. Among the remaining stocks, the 30 with the highest 12-month historical dividend yields are selected to be included in the index.

Those constituents are weighted according to the inverse of their volatility, with a cap at 10%. The indices are reviewed quarterly.

Key facts

»Index selects 30 European sustainability leaders with low volatility and high dividend yields

»Companies are compliant with the Global Standard Screenings and are not involved in Controversial Weapons.

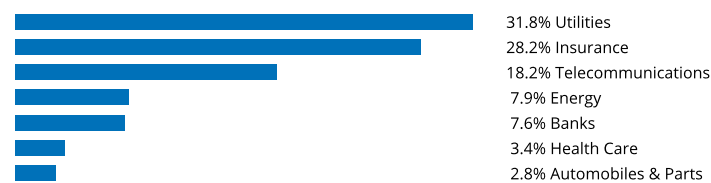

»Product involvement filters are applied excluding companies involved in Thermal Coal, Tobacco and Military Contracting.

»Liquidity filters ensure replicability

Methodology

All stocks in the relevant base universe are screened to ensure companies engaged in Controversial Weapon activities, or non-compliant with the Global Standard Screenings (GSS), as identified by Sustainalytics, are excluded. Additionally, companies involved in Tobacco, Thermal Coal and Military Contracting are also excluded. Moreover, companies are screened for 12-month historical daily pricing and dividend yield data. If one or both values are not available for a stock, the company is removed from the base universe.

All remaining stocks are then ranked in ascending order in terms of volatility (maximum between the 3-month and 12-month historical volatility in EUR) and all stocks which do not belong to the top x% are excluded.

All remaining stocks are then ranked in descending order in terms of 12-month historical dividend yield and the top x% are selected to be included in the Select index. Those constituents are weighted according to the inverse of their volatility, with a cap at 10%. The composition is reviewed quarterly.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
