#### STOXX® AI Global Artificial Intelligence Index

STOXX® Developed and Emerging Markets Total Market Index

### Methodology

The parent index of the STOXX AI Global Artificial Intelligence Index is the STOXX® Developed and Emerging Markets Total Market Index.

Companies are included in the index if they own significant Al-related intellectual property (IP), i.e. if they have been granted a significant number of Al-related patents. A companys Al IP is deemed to be significant if both its Al IP exposure and its Al IP contribution fall within the top 75% of companies (calculated based only on those companies which have AI IP exposure and make an AI IP contribution).

The remaining companies are then screened for liquidity, only selecting stocks with a 3-month average daily trading value (ADTV) greater than 1,000,000 EUR. The index is equal-weighted.

The detailed methodology including the calculation formula can be found in our rulebooks: www.stoxx.com/rulebooks
