Methodology

The index components exactly match the parent index members, i.e. the EURO iSTOXX 50 ESG Focus Index consists of the same stocks as the EURO STOXX 50 Index.

On a quarterly basis, a specific weight is attributed to each component according to a pre-defined weighting scheme, that considers the overall ESG score of each company. Companies with the highest ESG scores are attributed the highest weights, regardless of their free-float market cap. ESG scores are based on indicators provided by Sustainalytics.

The detailed methodology including the calculation formula can be found in our rulebook: www.stoxx.com/indices/rulebooks.html
