STOXX® GLOBAL ESG ENVIRONMENTAL LEADERS **INDEX**

Index description

The STOXX Global ESG Leaders indices consist of one broad and three specialized indices for the areas environmental, social and governance. The three specialized indices form the broad STOXX Global ESG Leaders Index.

The indices provide access to global sustainability leaders through quantitative selection. The sustainability data in environmental, social and governance areas is provided by Sustainalytics. The indices follow a bottomup approach and are based on company's ESGscores.

Key facts

»Scoring methodology looks at each company individually and makes clear differentiations between different types of companies

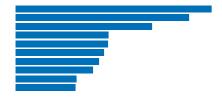

»Specialized indices - STOXX Global ESG Environmental Leaders, Social Leaders and Governance Leaders - are also available separately and may be combined in all variations

»Methodology allows a detailed attribution of sustainability performance for index components and non-components

Performance and annual returns4

Methodology

The universe consists of all stocks in the STOXX Global 1800 Index. Companies involved in controversial weapons or which do not comply based on Sustainalytics Global Standards Screening assessmentare excluded. Companies passing the initial selection criteria are ranked by STOXX according to a transparent evaluation system provided by Sustainalytics. The system ranges from 0 to 100 points and is applied for each category: environmental, social and governance. To be included in one of the specialized indices, e.g. the STOXX Global ESG Social Leaders Index, companies must score in the top quartile (25th percentile) in that category and get an above average score (50th percentile) in the other two (governance, environmental). Index components are weighted according to their ESG scores. The detailed methodology including exclusion criteria and the calculation formula can be found in the ESG rulebook: www.stoxx.com/indices/rulebooks.html

STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Börse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Börse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Börse Group or their licensors, research partners or data providers.

BACKCASTED PERFORMANCE

This document contains index performance data based on backcasting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on the initial constituents. Backcasted performance information is purely hypothetical and is provided in this document solely for information purposes. Backcasted performance does not represent actual performance and should not be interpreted as an indication of actual performance

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies

³ gr. div. yield is calculated as gr. return index return minus price index return
