

ISTOXX® EUROPE NEXT DIVIDEND LOW RISK 50 INDEX

Index description

The iSTOXX Europe Next Dividend Low Risk 50 Index selects liquid companies on a monthly basis from the STOXX Europe 600 that will pay a dividend in the near future and have historically shown low volatility. All stocks are risk-weighted.

Key facts

» Companies are selected from one of Europe's most representative indices, the STOXX Europe 600

» High liquidity is ensured by applying a EUR10 mn ADTV filter

» Low volatility and drawdown are achieved by using a selection method and weighting scheme based on historical 6-month volatility

» The index offers an attractive dividend yield by applying an overlay that selects companies that are about to pay out a dividend and by updating the portfolio monthly

Methodology

The index universe is defined by the STOXX Europe 600 Index. In the first step, a liquidity filter of EUR10 mn is applied. In the next step, remaining companies are sorted by increasing volatility and the top third (i.e. with low volatility) are selected. From that selection list, the 50 highest ranked companies that are going to pay a dividend in the next month are chosen as components. If less than 50 companies will pay a dividend in the next month, the highest ranked companies which are not paying a dividend are selected to complete the index. All stocks are risk-weighted.

The detailed methodology including the calculation formula can be found in our rulebook: <http://www.stoxx.com/indices/rulebooks.html>

DISCLAIMER

STOXX, Deutsche Börse Group and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, Deutsche Börse Group and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, Deutsche Börse Group or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, Deutsche Börse Group or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
