

# STOXX® GLOBAL EQUITY FACTOR INDEX

## Index description

The STOXX Equity Factor Index Family indices are constructed by maximizing the index exposure to a multi-factor alpha signal while satisfying a set of constraints intended to closely track their parent indices.

## Key facts

- » Designed to capture the fundamental drivers of equity performance.
- » Diversified multi-factor exposure to a combination of five target style factors: momentum, quality, value, low volatility, and low size.
- » Combines robust STOXX indexing capabilities with industry leading Axioma factor risk models and portfolio optimizer.
- » Reviewed quarterly in March, June, September.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> gr. div. yield is calculated as gr. return index return minus price index return
