

ISTOXX® AI GLOBAL ARTIFICIAL INTELLIGENCE 100 INDEX

Index description

The iSTOXX AI Global Artificial Intelligence 100 Index allows a targeted investment in 100 companies from a wide range of industries that invest heavily in the development of new AI technologies. These companies are therefore considered to be well-positioned to benefit from the increased adoption of AI technologies.

STOXX teamed up with an award-winning AI company, Yewno, whose proprietary AI algorithms, which include knowledge graph techniques, are used to identify the index constituents from the universe of the STOXX® Developed and Emerging Markets Total Market Index. The key criterion used in the selection process is patent filings related to AI IP, thereby identifying AI innovators as well as AI adopters.

The index is equal-weighted and sets a minimum liquidity threshold to EUR 5 million.

Key facts

- »Index allows targeted investment in AI, a significant megatrend.
- »Unique selection process based on an artificial intelligence algorithm developed by Yewno Inc. to identify companies which invest heavily in AI technology, i.e. own a significant amount of AI related IP.
- »Liquidity filters ensure replicability.

Methodology

The parent index of the iSTOXX® AI Global Artificial Intelligence 100 Index is the STOXX® Developed and Emerging Markets Total Market Index.

Companies are included in the index if they own significant AI-related intellectual property (IP), i.e. if they have been granted a significant number of AI-related patents. At first, companies from the parent index with no positive AI Exposure and AI Contribution are excluded. In case there are companies with multiple share lines, only the largest one in terms of free-float market cap is considered. Then, the median values of the AI Exposure and the AI Contribution are calculated. Only companies having in both the AI Exposure and AI Contribution values equal or greater than the respective median are eligible for selection. Finally, a liquidity filter is applied and the largest 100 of the remaining companies, in terms of free-float market cap, are selected.

The index is equally weighted and its composition is reviewed quarterly.

The detailed methodology including the calculation formula can be found in

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
