

EURO ISTOXX® EQUAL INDUSTRY ESG 30 INDEX

Index description

The EURO iSTOXX Equal Industry ESG 30 Index is comprised of companies from the EURO STOXX® Index that have demonstrated good performance with regard to Environmental, Social and Governance criteria, compared to their industry peers. Moreover, the components are chosen in a way that ensures diversification across all industries by selecting an equal number of companies from each industry and allocating equal weights to each one of them.

Key facts

»Securities rank highly in terms of their ESG performance, compared to their industry peers

»Index ensures industry diversification by providing exposure to blue-chip companies from each industry in the Eurozone

Performance and annual returns⁴

Methodology

The EURO ISTOXX Equal Industry ESG 30 Index selects 30 large securities from the EURO STOXX® Index that rank highly in terms of their ESG performance, compared to their industry peers.

Securities that belong to the EURO STOXX® Index are screened for their current ESG scores, as calculated by Sustainalytics' transparent ESG performance model. Securities that do not have ESG ratings are not eligible for selection. Furthermore, companies that are non-compliant with the Global Standards Screening or involved in controversial weapons are assigned an ESG score of 0. Only six securities with the highest free float market capitalization from each ICB industry are eligible for the next step of the selection process. From the remaining selection universe, three stocks with the highest ESG performances from each ICB industry are selected for the final index composition. The index is reviewed quarterly, and constituents are assigned equal weights.

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
