

# ISTOXX® GLOBAL ESG TREND SELECT 30 INDEX

## Index description

The iSTOXX Global ESG Trend Select 30 Index tracks the performance of 30 liquid stocks with low volatility and high dividend yield, that have improved or maintained their ESG performance in the last year. Companies that are in contravention of the Global Standards Screening or are involved in Controversial Weapons activities, as identified by Sustainalytics, are excluded. Companies involved in Adult Entertainment, Gambling, Conventional Oil & Gas, Unconventional Oil & Gas (Arctic Oil and Gas Exploration, Oil Sands and Shale Energy), Nuclear Power, Thermal Coal, Tobacco, Weapons (Small Arms and Military Contracting), Aerospace and Defense are also excluded. An additional filter excludes poor ESG performers from the index. Industry and country neutrality filters are applied to ensure diversification.

## Key facts

» Selection of 30 liquid stocks with low volatility and high dividend yield from a range of companies that have improved or maintained their ESG performance in the previous year

» Liquidity filter ensures replicability.

» Companies are Global Standards Screening-compliant and are not involved in Controversial Weapons.

» Product involvement filters are applied.

» Companies with the lowest ESG scores are filtered out.

Performance and annual returns<sup>4</sup>

## Methodology

The parent index is the STOXX® Global 1800 Index. Components that are engaged in controversial activities or non-compliant with the Global Standards Screening, are excluded. Moreover, only companies that have not suffered a decrease in their ESG score, as calculated by Sustainalytics, in the last 12 months are considered eligible for selection. In addition, the eligible companies are ranked based on their current ESG score; the bottom 20% of companies are excluded. All remaining companies are ranked based on their volatility, and the 200 securities with the lowest volatility proceed to the final step. Here, the 30 companies with the highest dividend yields are selected for inclusion in the index such that country and industry diversification constraints are met.

The index is weighted by the inverse of the selected stocks' volatility; component weight is capped at 10%. The index composition is reviewed quarterly.

The detailed methodology including the calculation formula and the list of sectors can be found in our rulebooks: [www.stoxx.com/rulebooks](http://www.stoxx.com/rulebooks)

## DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return
