Methodology

The iSTOXX Global ESG US Leg Equal Weight Index selects companies from the STOXX USA 500 ESG-X Index. Companies involved in unconventional oil & gas are excluded. The remaining companies are ranked in terms of ESG scores, as calculated by Sustainalytics, and the top 200 are retained. These 200 companies are ranked in terms of free-float market capitalization and the largest 30 are selected. The constituents are equal-weighted and the index is reviewed on a quarterly basis.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
