

STOXX® GLOBAL HEALTH & WEIGHT LOSS INDEX

Index description

The STOXX Health & Weight Loss indices are comprised of companies that stand to benefit from the immediate need of addressing the rising obesity levels in the global population. The obesity epidemic constitutes one of the most pressing health challenges with a major global economic impact. Therefore, the global focus on fighting obesity can be a driver of enhanced revenues for companies exposed to this theme.

Revere (RBICS) data allow a detailed breakdown of the revenue sources of the eligible companies, helping this index to select companies with substantial exposure to "fighting globesity" trend.

Furthermore, the index excludes companies that Sustainalytics considers to be non-compliant based on the Sustainalytics Global Standards Screening assessment or to be involved with controversial weapons.

Key facts

»Index allows targeted investment in the companies associated with the Globesity theme

»Detailed Revere data helps identify and select companies with a revenue exposure above 50% to sectors related to the Globesity theme

»Liquidity filter ensures replicability

»Index integrates ESG considerations

»The detailed methodology can be found in our rulebooks: www.stoxx.com/rulebooks

Performance and annual returns⁴

Methodology

The Global version of the index is derived from STOXX Developed and Emerging Markets Total Market, STOXX China A Total Market (accessible through Stock Connect), STOXX China ADR Total Market, STOXX China P Chips Total Market indices. The Global ex China A index version does not consider China A securities.

Two screens are applied: first, only stocks with a three-month median daily trading volume (MDTV) greater than EUR 1,000,000 are included; second, only companies with revenue exposure of more than 50% to the sectors associated with the theme are selected. Companies that Sustainalytics deems to be non-compliant with the Global Standards Screening or to be involved with controversial weapons are excluded.

The index is weighted proportionally to the free-float market cap of the selected stocks multiplied by their aggregate revenue exposure to themes. Weights are capped as follows: the sum of all weights above 4.5% should not exceed 35%, and no single weight should exceed 8%.

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
