Methodology

The parent index of the STOXX World AC NexGen Software Development Index is the STOXX World AC All Cap Index.

A set of country, size and liquidity screens are applied on the STOXX World AC NexGen Software Development Index to capture liquid companies from eligible countries. The STOXX World AC NexGen Software Development Index select companies that generate more than 50% of revenues within the aggregate of the FactSet RBICS sectors associated with the theme.

The index is weighted proportionally to the free-float market cap of selected stocks multiplied by the aggregate revenue exposure of each stock, with concentration capping. The index composition is reviewed annually in June.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
