

STOXX® EUROPE STRONG VALUE 20 INDEX

Index description

The STOXX Strong Style indices represent the performance of the most style-pure companies in Europe and the Eurozone. While the STOXX Strong Growth 20 indices and the STOXX Strong Value 20 indices cover the purest growth and value companies in Europe and the Eurozone, the STOXX Strong Style Composite 40 indices combine both style indices, i.e. the most style-pure companies of each style category in the relevant region.

Key facts

» Weighting is purely based on the relevant value or growth score

Methodology

The indices are derived from the STOXX Europe TMI and the EURO STOXX indices. Six factors are applied to define a company's style designation and are condensed into a single style score, leading to a number that measures a company's style purity.

The six factors used when selecting components for the STOXX TMI Style Index are normalized as z-scores. The six factors and the detailed methodology including the calculation formula can be found in our rulebook: www.stoxx.com/indices/rulebooks.html

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
