## STOXX® UAE ALL CAP INDEX

#### **Index description**

The STOXX UAE All Cap Index is a market cap weighted index designed to represent the performance of the Large, Mid and Small cap companies from UAE. STOXX UAE All Cap Index is suitable for global investment products which include funds, exchange traded funds, and derivatives and can also be used for further building block approach strategies when appropriate. It follows a robust and modular framework which enables investors to utilize this index for a variety of investment objectives whilst using a consistent approach. It is derived from STOXX World Equity Index series and its countries follow the STOXX World Country Classification Framework.

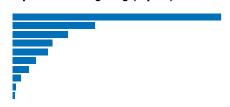

#### **Key facts**

- »Broad, yet liquid coverage of Large, Small and Mid cap companies that supports clients' global investment decisions whilst avoiding home biases.
- »Can serve as a basis for numerous derived strategies.
- »Constructed using STOXX World Methodology.
- »Its countries follow the STOXX World Country classification framework.

#### **Descriptive statistics**

| Index                                | Market cap (USD bn.) |            |      | Components (USD bn.) |         | Component weight (%) |         | Turnover (%) |                |

#### **BACKTESTED PERFORMANCE**

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

#### CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies

<sup>3</sup> gr. div. yield is calculated as gr. return index return minus price index return
