STRATEGY INDICES

Index description

The iSTOXX Global ESG Select 100 Index is based on the STOXX Global ESG Leaders Index and provides access to global sustainability leaders through a quantitative selection process in the following areas: environmental, social and governance. The underlying ESG index consists of three subindices which roll into the STOXX Global ESG Leaders Index. The three subindices are: STOXX Global ESG Environment Leaders; STOXX Global ESG Social Leaders; STOXX Global ESG Governance Leaders.

Using this ESG index as an underlying, stocks with the lowest volatility and the highest dividends are selected.

Key facts

» This index combines the key advantages from three strategies; low volatility, high dividend all selected from economically sustainable companies

» It is the first index of its kind and follows a clear and transparent methodology

» The underlying index, the STOXX Global ESG Leaders Index, is based on independent company ratings provided by Sustainalytic's proven rating methodology based on DVFA/EFFAS ""KPIs for ESG 3.0""

» A detailed company analysis on KPI (Key Performance Indicators) level is made public to index licensees; high level company analysis is freely available

Performance and annual returns⁴

Methodology

The index universe is the STOXX Global ESG Leaders Index.

1. All stocks are ranked from highest to lowest in terms of gross dividend yield.

2. For all stocks, the realized volatility over the immediate past 252 trading days is calculated and stocks are ranked from lowest to highest volatility.

3. An average rank is constructed based on the dividend and volatility rankings. For example: if a stock ranks three in terms of dividend yield and five in terms of realized volatility, the average rank is four.

4. The top 100 stocks in terms of average rank will be the constituents. The detailed methodology including the calculation formula can be found in our rulebook: www.stoxx.com/indices/rulebooks.html

BACKTESTED PERFORMANCE

DACK ICS IED PERFORMANCE This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return <u>⁴ STOXX data from Sep. 20, 2004 to Jul. 31, 2023</u>
