Methodology

The index universe is all constituents in the STOXX Global 1800 Index for the iSTOXX Global Broad Demography Index, and the STOXX Europe 600 Index for the iSTOXX Europe Broad Demography Index. All companies linked to one of the following seven groups according to their ICB sector code are selected: Finance, Infrastructure, Leisure & Luxury, Pharmaceuticals, Resources, Real Estate and Telecom, Media & Tech. All constituents whose ICB sector is not relevant are excluded.

Each selected stock has a free-float market cap weighting, with a 10% capping at the component level.

The detailed methodology including the calculation formula can be found in our rulebook: www.stoxx.com/rulebook
