

ISTOXX® GLOBAL DIVERSITY ENHANCED IMPACT SELECT 30 INDEX

Index description

The iSTOXX Global Diversity Enhanced Impact Select 30 Index focuses on a pool of leading companies in terms of workforce diversity and anti-discrimination policies from which it selects 30 liquid stocks with low volatility and high dividend yield.

Industry and country neutrality filters are applied in the selection process to ensure diversification. Companies non-compliant based on Sustainalytics Global Standards Screening Assessment or are involved in Controversial Weapons activities, as identified by Sustainalytics, are excluded. Additionally, the Coal and the Tobacco sectors are excluded.

Key facts

- » Selection from market-representative and liquid benchmark
- » Attractive theme (diversity in the workplace)
- » Low volatility anomaly: stocks with low volatility perform better than others
- » High dividend screening to generate returns
- » Balanced approach between the volatility and dividend screenings
- » Excluding companies engaged in controversial activities
- » Additional controls to ensure diversification across industries and regions

Methodology

The index universe is the STOXX Global 1800 Index excluding companies non-compliant based on Sustainalytics Global Standards Screening Assessment or involved in Controversial Weapons, Tobacco or Coal. Only companies with a 3-month average daily trading volume (ADTV) of more than EUR 5 million are considered. Half the stocks from that universe that have the lowest Diversity Impact score (defined as the average of the S.1.2 Discrimination Policy Raw Score and S.1.3 Diversity Programmes Raw Score Social indicators from Sustainalytics) are excluded. Afterwards, the 300 companies with the lowest previous 3- and 12-month historical volatilities are selected. Finally, among the remaining stocks, the top 30 with the highest 12-month historical dividend yields are included in the index, in such a way that diversification across industries and countries is ensured. The constituents are weighted according to the inverse of their volatility with a cap at 10% per component. The indices are reviewed quarterly. The detailed methodology including the calculation formula can be found in our rulebooks: www.stoxx.com/rulebooks

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX indices, DAX indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
