

STOXX® ASIA/PACIFIC LARGE 200 INDEX

Index description

The STOXX Size Indices have a fixed number of components and are designed to provide a broad yet liquid representation of large, mid and small caps in their respective regions or countries. The total number of index components is indicated in the index name. Each size segment contains a third of the total number, meaning that each size segment has an equal number of stocks. For example, the STOXX Asia/ Pacific 600 Index contains 200 large, 200 mid and 200 small stocks.

Key facts

- » Transparent and rules-based methodology
- » Buffer rule applied on parent index level aims to reduce turnover
- » Weighted by free-float market cap
- » Serves as an underlying for a variety of financial products such as options, futures and ETFs

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
