

STOXX® WILLIS TOWERS WATSON WORLD CLIMATE TRANSITION INDEX

Index description

The objective of the STOXX World WTW Climate Transition Indices is to align a broad based equity index, from a valuation and financial perspective, with a global economic transition that would limit greenhouse gas concentrations to levels consistent with United Nations objectives for global temperature rises. The index relies on Climate Transition Value at Risk (CTVaR) metrics from Willis Towers Watson, and incorporates screens for Global Standards Screening, Controversial Weapons, Thermal Coal and Oil Sands.

Key facts

- »The index is designed to closely track the parent index.
- »The index relies on Climate Transition Value at Risk (CTVaR) metrics from Willis Towers Watson to reduce the financial risk of transition to a global economy consistent with the UN global warming objectives.
- »Product involvement screens applied are based on data from award winning ESG data provider Sustainalytics.

Methodology

The STOXX WTW Climate Transition Indices track the performance of liquid securities from a selection of STOXX Benchmark Indices.

Companies identified as non-compliant based on Sustainability Global Standard Screening (GSS) assessment or are involved in anti-personnel mines, biological and chemical weapons, cluster weapons, depleted uranium and white phosphorus weapons are not eligible for selection. In addition, companies with significant involvement in Thermal Coal and Oil Sands are also not eligible.

Eligible companies are weighted based on their free-float market capitalization adjusted by Climate Transition Value at Risk (CTVaR) metrics from Willis Towers Watson that measures a company's readiness for the global economic transition to a low carbon economy.

Quick facts

| | |

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
