

# STOXX® EUROPE 600 ENERGY ESG+ INDEX

## Index description

The STOXX Europe 600 Energy ESG+ Index tracks the performance of the companies of the STOXX Europe 600 belonging to the ICB Energy Industry after a set of compliance, involvement and ESG performance screens are applied. Companies that are non-compliant based on the ISS-ESG Norms Based Screening assessment or are involved in Controversial Weapons are not eligible for selection. Additional exclusion filters are applied, screening companies for involvement in Tobacco, Thermal Coal, Unconventional Oil & Gas, Civilian Firearms, and Military Contracting. If less than 20% of the companies belonging to the Energy Industry in the STOXX Europe 600 are excluded by the screens, the worst companies in terms of ESG Score are excluded until the number of selected securities reaches 80% of the number of securities belonging to the Energy Industry in the underlying index.

## Key facts

»Categorization according to their primary source of revenue guarantees an accurate classification of companies in their respective business environments.

»Component capping ensures that no component can dominate the index.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
