# ISTOXX INDICES

## Index description

The iSTOXX Global Ethical Select 30 Index is comprised of 30 liquid stocks with low volatility and high dividend yield that are selected from a pool of companies that are in alignment with the moral and social teachings of the Christian religion (social, environmental, ethical and economic responsibility). Industry and country filters are applied in the selection process to ensure diversification.

Companies that are in contravention of the Global Standards Screening or are involved in Controversial Weapons activities, as identified by Sustainalytics, are excluded. Additionally, companies involved in Weapons (Small Arms and Military Contracting), Animal Testing, Fur and Specialty Retail, Adult Entertainment, Alcoholic Beverages, Gambling, Tobacco, Abortion, Contraceptives, Human Embryonic Stem Cells, Genetically Modified Plants and Seeds, Pesticides, Palm Oil, Predatory Lending, Unconventional Oil & Gas (Arctic Oil and Gas Exploration, Oil Sands and Shale Energy), Conventional Oil & Gas, Thermal Coal, and Nuclear Power are also excluded.

## Key facts

»Selection of 30 liquid stocks with low volatility and high dividend yield

»Liquidity filter ensure replicability

»Companies are Global Standards Screening-compliant and are not involved in Controversial Weapons

»Product involvement filters are applied to ensure that companies are in alignment with the moral and social teachings of the Christian religion

## Performance and annual returns<sup>4</sup>

## Methodology

The parent index is the STOXX Global 1800. First, companies that are noncompliant with Global Standards Screening or engaged in controversial activities are excluded. Product involvement filters are applied to exclude companies that are not in alignment with the moral and social teachings of the Christian religion. The eligible companies are ranked based on their dividend yield - the top x% highest dividend yield companies proceed to the next step (x being calculated as the square root of the number of stocks in the base universe divided by the target number of stocks in the Select index). All remaining companies are ranked based on their volatility - the 30 companies with the lowest volatility are selected such that country and industry diversification constraints are met.

The index is weighted by the inverse of the selected stocks' volatility; the component weight is capped at 10%. The index composition is reviewed quarterly.

The detailed methodology including the calculation formula and the list of sectors can be found in our rulebooks: www.stoxx.com/rulebooks

#### BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

#### CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> Net dividend yield is calculated as net return index return minus price index return <sup>4</sup> STOXX data from Mar. 19, 2012 to Jun. 30, 2023
