

# ISTOXX® GLOBAL 5G & NEXGEN TELECOMMUNICATION COMPONENTS INDEX

## Index description

The iSTOXX Global NexGen Communication Innovative Technology Index is comprised of companies that stand to benefit from the continuous technological advancement in the telecommunications industry. The index focuses specifically on companies providing the network equipment, infrastructure and semiconductors required for the rollout of telecommunications services.

The index selects profitable companies that derive significant revenues from 32 sectors associated with the innovative communications technology theme, based on FactSet Revere (RBICS) data. Companies with the lowest investments in research and development are excluded, as are those that fail to meet thresholds of size and liquidity. Final selection into the index is determined by company size.

The investment universe consists of all stocks in France, Germany, Japan, Netherlands, South Korea, United Kingdom, United States, Hong Kong and Taiwan. Also included are China A shares listed in Shanghai/Shenzhen that are participants of the Stock Connect Program, as well as Chinese ADRs and so-called P Chips, Red Chips and H-Shares. The index is free-float market-

## Key facts

»Index allows targeted investment in the NextGen Communication Innovative Technology theme

»Detailed FactSet Revere (RBIC) data helps identify and select companies with a revenue exposure above 30% to sectors linked to the theme

»Liquidity filter ensures replicability

»Profitability screen strengthen investment proposal

»Filter based on R&D expenses filters out companies that are not investing in innovation

## Descriptive statistics

## Methodology

The parent universe consists of companies from a combination of STOXX Country Total Market indices: France, Germany, Japan, Netherlands, South Korea, United Kingdom, United States, Hong Kong, Taiwan and China (ADRs, P chips, Red Chips, H Shares and A Shares that are accessible through Stock Connect).

Only companies with revenue exposure of more than 30% to the sectors associated with the theme are selected. FactSet Revere (RBICS) data allow a detailed breakdown of the revenue sources of the eligible companies, helping this index to select companies with substantial exposure to the theme.

Illiquid stocks are excluded, alongside companies with negative ROE and/or EPS in the last year. Companies with the lowest investments in R&D are then also excluded. Finally, the 100 remaining companies with the highest free-float market capitalization are selected for inclusion in the index. The index

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> gr. div. yield is calculated as gr. return index return minus price index return
