

STOXX® EUROPE ESG-X SELECT DIVIDEND 30 INDEX

Index description

The STOXX ESG-X Select Dividend indices are derived from the STOXX ESG-X indices and select stocks which represent the highest-yielding stocks relative to their home markets in the respective benchmark index. The STOXX ESG-X Index Family applies standardized ESG exclusion screens for Global Standard Screening, Controversial Weapons, Thermal Coal and Tobacco Producers, with the aim of taking responsible investment criteria into account.

Key facts

»Components are weighted by their indicated annual net dividend yield, i.e. the largest dividend-yielding companies have the highest weight in the index.

»The ESG-X Select Dividend indices are derived from the respective ESG-X Benchmark indices on which ESG screens are applied, based on responsible policies, aiming to reduce reputational and idiosyncratic risks.

»Fixed component number and cap factors guarantee index diversification.

»Liquidity screening ensures the index is suitable as an underlying for financial products.

Methodology

The index universe is the relevant STOXX ESG-X benchmark index. Only dividend-paying companies are eligible and must have a non-negative historical five-year dividend-per-share (DPS) growth rate and a defined DPS to EPS ratio. For the selection, eligible companies are sorted by an out-performance factor to their home market and ranked accordingly. A minimum liquidity level and a buffer rule are applied. Detailed index methodology, including information on the outperformance factor and the DPS to EPS ratio can be found in our rulebook: <https://www.stoxx.com/rulebooks>

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
