

STOXX® EUROPE SUSTAINABILITY 40 INDEX

Index description

The STOXX Europe Sustainability 40 Index offers a consistent, flexible and investable blue-chip representation of the largest European sustainability leaders, i.e. the European top leaders in terms of long-term environmental, social and governance criteria. Compared to other equity indices, the STOXX Europe Sustainability 40 Index is weighted according to sustainability scores.

Based on the broad STOXX Europe Sustainability Index, the STOXX Europe Sustainability 40 Index covers 40 stocks from various European countries.

The ratings are based on the proprietary research approach of Bank Sarasin. Their analysis is based on industry-specific and other criteria that cover the three most important dimensions of sustainability: environmental, social and governance.

Key facts

» Very suitable for asset managers, as they provide them with comprehensive and accurate benchmarks for European sustainability portfolios

Methodology

Components are selected from the STOXX Europe 600 Index according to their sustainability rating (combination of company and sector rating). All companies with a positive sustainability rating are selected for the next step.

A rating is defined as positive if the combination of the company and the sector rating results in a shaded matrix field in the Sarasin Sustainability Matrix. All companies are ranked according to their free-float market capitalization. The top 40 companies are selected, however, only a maximum of five companies per supersector can be included in the index.

In deviation from Bank J. Safra Sarasin's standard approach, STOXX is including tobacco, adult entertainment and defense & armament in the universe for STOXX Europe Sustainability and EURO STOXX Sustainability. These criteria are considered for exclusion in the indices STOXX Europe/ EURO STOXX Sustainability ex AGTAF/ ex AGTAF respectively.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
