BROAD INDICES

STOXX® HONG KONG 210 INDEX

Index description

STOXX global benchmark indices provide a broad yet liquid representation of different regions and countries.
The indices are derived from their respective Total Market Index (TMI). They are weighted according to free-float market cap and cover about 95% of the free-float market cap of the relevant region or country.
Key facts

»Broad and liquid benchmarks for market regions and countries worldwide

» Broad number of components

» Serve as benchmarks for their respective regions/actively managed funds

» Serve as an underlying for a variety of financial products, are used for academic research and receive wide media coverage

Methodology

The universe is the relevant Total Market Index (TMI). All stocks in the index universe are ranked by free-float market cap to produce the index selection list. Target coverage: 95% of the free-float market cap of the index universe. The detailed methodology including the calculation formula can be found in our rulebook : www.stoxx.com/indices/rulebooks.html

Quick facts

Weighting	Free-float market cap
Cap factor	20%
No. of components	Fixed component (exact number indicated in index name)
Review frequency	Quarterly, in Mar., Jun., Sep., Dec.

To learn more about the inception date, currency versions, calculation hours and historical values, please see our data vendor code sheet.

BACKTESTED PERFORMANCE
This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION
The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers a wide range of customization, in terms of component selection, weighting schemes and personalized calculation methodologies.

[3] gr. div. yield is calculated as gr. return index return minus price index return
[4] STOXX data from Dec. 27, 2001 to Jun. 30, 2023

(EUR, gross return), all data as of Jun. 30, 2023
