Methodology

The index components exactly match the parent index members, e.g. the EURO STOXX® 50 Equal Weight Index consists of the same stocks as the EURO STOXX 50® Index. The same weight is attributed to all components each quarter, regardless of their free-float market cap. Extraordinary replacements are added at the same weight as the deleted stock. The detailed methodology including the calculation formula can be found in our rulebook: <http://www.stoxx.com/indices/rulebooks.html>
