ISTOXX INDICES EURO ISTOXX® AMBITION CLIMAT PAB INDEX

Index description

The EURO STOXX Ambition Climat PAB Index is based on liquid securities from the EURO STOXX Total Market Index. The index follows the EU Paris-Aligned Benchmark (EU PAB) requirements outlined by the European Commission for climate benchmarks.

Companies identified as non-compliant based on Sustainalytics Global Standards Screening (GSS) assessment, or are involved in anti-personnel mines, biological and chemical weapons, cluster weapons, depleted uranium and white phosphorus weapons are not eligible for selection. Securities that generate revenues above a certain threshold from coal, oil, gas or generate power with carbon intensity of lifecycle emissions higher than 100g CO2e/kWh, as identified by ISS ESG, are excluded. Furthermore, STOXX will exclude companies that ISS ESG assesses to have Significant Obstruction in the UN SDGs 12,13,14 and 15.

The weighing process follows an optimization process with the aim to reduce the index green house gas intensity by at least 50% when compared to the benchmark. The index is also designed to meet the year on year 7% decarbonisation target, with trajectory in line or beyond the 1.5C scenario by 2050, as verified by ISS ESG.
