

ISTOXX® MUTB ASIA/PACIFIC QUALITY DIVIDEND 100 INDEX

Index description

The iSTOXX MUTB Asia/Pacific Quality Dividend 100 index selects 100 stocks from the STOXX Asia/Pacific 600 Index that comply with dividend quality, fundamental and price stability criteria. When selecting additions to the index during the periodical rebalancing, priority is given to high dividend yielding stocks.

Key facts

» Ideal to achieve a balanced exposure between a dividend paying and a high quality strategy

» Low volatility and dividend yield preference achieved by weighting

» Diversification through broad selection and capping of component weights to 3%

Methodology

The stocks are derived from their benchmark index, the STOXX Asia/Pacific 600. REITs, identified by ICB sector 351020 are excluded from the universe. Filtering and selection is performed using fundamental indicators and price stability rules. The final 100 stocks include current components and high dividend yielding additions. The indices are price weighted based on a combined factor of the inverse of each stocks standard deviation and the dividend amount with a 3% capping per constituent.

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX indices, DAX indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
