## Methodology

The iSTOXX Global Industry Neutral ESG 600 Index is based on the STOXX® Global 1800 universe. STOXX excludes companies that Sustainalytics considers to be non-compliant with the Sustainalytics Global Standards Screening assessment, as well as companies identified to be involved with controversial weapons.

The index is created by selecting companies with an Environmental, Social and Governance (ESG) score  $\geq 50$ , picking the 600 companies with the highest Total Rating Score, as provided by Sustainalytics. A capping algorithm is applied to calculate component weights so that the ICB Industry weight of the index is similar to the ICB Industry weight of the benchmark, i.e. the STOXX Global 1800 Index.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.
