

# ISTOXX® AMERICAN CENTURY USA QUALITY VALUE INDEX

## Index description

The iSTOXX® American Century USA Quality Value Index concept allocates dynamically to both a value and an income strategy. The allocation of the strategies is governed by a risk-adjusted momentum signal. The value strategy is the iSTOXX® American Century USA Value Index, which aims at investing in quality companies with sound fundamentals and attractive valuation. The income strategy is the iSTOXX® American Century USA Income Index, which aims at investing in quality companies with sustainable income and high dividends.

## Key facts

- »Dynamic allocation between value and income strategies.
- »Momentum signal determines allocation.
- »Capping mechanism ensures balanced approach.
- »Rebalanced monthly.

## Methodology

The parent indices are the iSTOXX American Century USA Value Index and the iSTOXX American Century USA Income Index. The index's strategy shifts its relative target allocation between the value and income strategies in 15 percentage point increments. Target allocation is adjusted monthly based on a risk-adjusted momentum signal. A strategy can have a maximum weight of 80%.

## DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

## BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

## CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

<sup>3</sup> gr. div. yield is calculated as gr. return index return minus price index return
