Methodology

The EURO STOXX Size indices are subsets of the STOXX Europe 600 Size indices, namely the STOXX Europe Large 200, STOXX Europe Mid 200 and STOXX Europe Small 200 indices. The size assignments are based on free-float market cap. The EURO STOXX Large Index is formed by taking all Eurozone listed companies in the STOXX Europe Large 200 Index. The detailed methodology including the calculation formula can be found in our rulebook:

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
