Methodology

The index universe is the relevant STOXX ESG-X benchmark index. Only dividend-paying companies are eligible and must have a non-negative historical five-year dividend-per-share (DPS) growth rate and a defined DPS to EPS ratio. For the selection, eligible companies are sorted by an out-performance factor to their home market and ranked accordingly. A minimum liquidity level and a buffer rule are applied. Detailed index methodology, including information on the outperformance factor and the DPS to EPS ratio can be found in our rulebook:
