## Methodology

The indices are derived from the STOXX Europe TMI and the EURO STOXX indices. Six factors are applied to define a company's style designation and are condensed into a single style score, leading to a number that measures a company's style purity.

The six factors used when selecting components for the STOXX TMI Style Index are normalized as z-scores. The six factors and the detailed methodology including the calculation formula can be found in our rulebook: [www.stoxx.com/indices/rulebooks.html](http://www.stoxx.com/indices/rulebooks.html)
