

STOXX® GLOBAL EX CHINA A VIDEO GAMING & ESPORTS INDEX

Index description

The STOXX Video Gaming & eSports indices are comprised of companies that stand to benefit from the continuously growing trend of video games and eSports. The increasing popularity of video gaming and the players' engagement has moved the eSports industry into the mainstream. eSports is a rapidly rising industry where professional video gamers compete with each other and its appeal to millennials significantly drives gaming demand.

Revere (RBICS) data allow a detailed breakdown of the revenue sources of the eligible companies, helping this index to select companies with substantial exposure to Video Gaming & eSports trend.

Furthermore, the indices exclude companies that Sustainalytics considers to be non-compliant based on the Sustainalytics Global Standards Screening assessment or to be involved with controversial weapons.

Key facts

- » Index allows targeted investment in the video gaming and eSports industry
- » Detailed Revere data helps to identify and select companies with a revenue exposure above 50% or above 2 billion EUR to video gaming and eSports sectors
- » Liquidity filter ensures replicability
- » Index integrates ESG considerations
- » More information about the index and detailed methodology can be found in our rulebooks: www.stoxx.com/rulebooks

Performance and annual returns⁴

Methodology

The parent universe for the Global version is derived from STOXX Developed and Emerging Markets Total Market, STOXX China A Total Market (accessible through Stock Connect), STOXX China ADR Total Market, STOXX China P Chips Total Market indices. The Global ex China A index does not consider China A securities.

The index applies two screens: first, only stocks with a three-month median daily trading volume (MDTV) greater than EUR 1,000,000 are included; second, only companies with revenue exposure of more than 50% or more than EUR 2,000,000,000 to the sectors associated with the theme are selected. Companies that Sustainalytics deems to be non-compliant with the Global Standards Screening or to be involved with controversial weapons are excluded.

The index is weighted proportionally to the free-float market cap of the selected stocks multiplied by their aggregate revenue exposure to themes. Weights are capped as follows: the sum of all weights above 4.5% should not exceed 35%, and no single weight should exceed 8%.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ gr. div. yield is calculated as gr. return index return minus price index return
