Methodology

The parent index of the STOXX Europe Luxury 10 Index is the STOXX Europe Total Market Index. The index applies liquidity, volatility, size and ICB subsectors screens. Furthermore, companies belonging to a defined set of countries and subsectors that derive more than 50% of their most recent total annual revenue from sectors linked to the luxury trend are highlighted as potential index components. It is a free-float market cap weighted index considering a luxury multiplier with a 20% cap per constituent. The index is reviewed annually in June.

The detailed methodology including the calculation formula can be found in our rulebooks: www.stoxx.com/rulebooks

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
