

STOXX® GLOBAL METAVERSE INDEX

Index description

Metaverse is an emerging concept that simulates the real world or imagines a world beyond it, integrating digital and physical interactions for an immersive experience. The STOXX Global Metaverse Index selects companies exposed to a defined set of technologies related to the ongoing adoption of the metaverse, ranging from those developing interactive virtual platforms, wearables and immersive technologies, to companies providing computer processing capabilities and infrastructure. STOXX uses EconSight's patent data, including patent Quality and Specialization scores, to identify companies that are market leaders and innovators in the identified technologies.

The index takes ESG considerations into account: companies that are non-compliant with the Global Standards Screening (GSS) or are involved in Controversial Weapons activities, or display a Severe (Category 5) Controversy Rating, as identified by Sustainalytics, are excluded. Additional exclusion filters are incorporated, screening companies for involvement in Weapons (Small Arms and Military Contracting), Unconventional Oil & Gas (Arctic Oil and Gas Exploration, Oil Sands and Shale Energy), Conventional Oil & Gas, Thermal Coal, Nuclear Power and Tobacco.

Key facts

- » Index allows targeted investment in the emerging Metaverse trend
- » EconSight's patent taxonomy, quality and specialization scores are used to identify key and innovative players
- » Inclusion of size and liquidity filters to ensure replicability of the index
- » Leveraging sustainability data from a leading provider (Sustainalytics) to avoid exposure to companies engaged in controversial activities

Descriptive statistics

Index	Market cap (EUR bn.)		Components (EUR bn.)				Component weight (%)		Turnover (%)
	Full	Free-float	Mean	Median	Largest	Smallest	Largest	Smallest	Last 12 months
STOXX Global Metaverse Index	N/A	11.5	0.2	0.1	1.1	0.0	9.7	0.0	23.6
STOXX Global Total Market Index	75,809.5	63,871.6	5.7	0.6	2,490.5	0.0	3.9	0.0	2.8

STOXX Global Total Market Index	-0.8	16.7	16.7	15.9	0.1	1.8	1.4	5.2

Performance and annual returns⁴

Methodology

A set of country, size and liquidity screens are applied on the STOXX® Global Total Market Index to capture liquid companies from developed and emerging countries. Additionally, companies that are not compliant with the Sustainalytics Global Standards Screening (GSS) assessment or are involved in Controversial Weapons and other controversial activities are excluded from selection.

EconSight's patent classification system is used to identify companies exposed to a defined set of technologies related to the ongoing adoption of the metaverse: 3D image modelling, Avatar, Blockchain, Digital Twin, Graphic Processing Unit, Non-Fungible Tokens and Virtual, Augmented and Extended Reality. The index is reviewed annually in March and weighted according to adjusted equal weights and adjusted by the metaverse patent specialization score. UCITS (4.5/8/35) is applied to ensure diversification. Furthermore, companies are assessed for any GSS, Controversies or UCITS violations on a quarterly basis.

The detailed methodology including the calculation formula can be found in

DISCLAIMER

STOXX, Deutsche Boerse Group (DBAG) and their licensors, research partners or data providers do not make any warranties or representations, express or implied, with respect to the timeliness, sequence, accuracy, completeness, currentness, merchantability, quality or fitness for any particular purpose of its index data and exclude any liability in connection therewith. STOXX, DBAG and their licensors, research partners or data providers are not providing investment advice through the publication of indices or in connection therewith. In particular, the inclusion of a company in an index, its weighting, or the exclusion of a company from an index, does not in any way reflect an opinion of STOXX, DBAG or their licensors, research partners or data providers on the merits of that company. Financial instruments based on the STOXX® indices, DAX® indices or on any other indices supported by STOXX are in no way sponsored, endorsed, sold or promoted by STOXX, DBAG or their licensors, research partners or data providers.

BACKTESTED PERFORMANCE

This document contains index performance data based on backtesting, i.e. calculations of how the index might have performed prior to launch if it had existed using the same index methodology and based on historical constituents. Backtested performance information is purely hypothetical and is provided in this document solely for information purposes. Backtested performance does not represent actual performance and should not be interpreted as an indication of actual performance.

CUSTOMIZATION

The index can be used as a basis for the definition of STOXX® Customized Indices, which can be tailored to specific client or mandate needs. STOXX offers customization in almost unlimited forms for example in terms of component selection, weighting schemes and personalized calculation methodologies.

³ Net dividend yield is calculated as net return index return minus price index return
